Reason For Allowance

The following is an examiner's statement of reasons for allowance:

The information regarding the Veronica plant cultivar Glory was available to persons of ordinary skill in the art in the application number 971485 filed in the European Community. The application was published on February 16, 1998. This printed publication was accessible to the public more than one year prior to filing of the instant application. A publication relied upon as prior art under 35 USC 102(b) must be enabling. The text of the relied upon publications standing alone would not enable one skilled in the art to practice the claimed invention.

When the claim is drawn to a plant, the reference, combined with knowledge in the prior art, must enable one of the ordinary skilled in the art to obtain or reproduce the plant. *In re Le Grice*, 301 F.2d 929, 133 USPQ 365 (CCPA 1962). If one skilled in the art could obtain and reproduce the plant from a publicly available source, then a publication describing the plant would have an enabling disclosure.

As stated in the affidavit of Michael Dunnett, Blakedown Nurseries (p.1-2) purchased 100 plants of Veronica 'Glory' in May of 1998. These 100 plants that were purchased from the inventor were never sold or publicly distributed. The plants were used for testing and propagation to build an inventory of plants. As stated in the attached affidavit of Michael Dunnett, a market test was performed in April of 1999, which is less than a year prior to the filing date of the present application.

Therefore, the printed publication number 971485 cannot be enabled because the disclosed cultivar has not been propagated or obtained from publicly available materials more than a year prior to the date of the present application.

The specification provides a complete botanical description of the claimed plant. The completeness of the description is sufficient to distinguish this new plant from the prior art as well it is sufficient to distinguish future application from this observed plant.
